

# Acknowledgments

I firmly believe life is meaningless without the right people (family, friends, and colleagues) to share it with. I sincerely thank everyone mentioned below. The quality of my relationship with you has profoundly impacted me: the way I think, the person I am, and so on.

**Committee members.** I would like to first thank my committee members: Prof. Lei Xing (my adviser), Prof. Yinyu Ye, Prof. Jean-Emmanuel Bibault, Prof. James Zou, and Prof. Michael Saunders.

I met Yinyu while taking his CME 307 class and started rotating with him. Yinyu suggested that I do applied machine learning and introduced me to my adviser Lei. I'm grateful to Lei for taking me as a student, supporting me through difficult times, our intense conversations, being available on the phone, and fostering a stimulating lab environment. I met Jean when he visited our lab for a year. From then on, he has patiently answered all the clinical questions I have had. I knew nothing about James until I read his email about a class on "Data Science and AI for COVID." I took the course, and we worked on an exciting project. James taught me how to write responses to reviews without taking them personally. It's funny, it's been two years, but we have never met in person. I first met Michael at a conference before applying to Stanford. Eventually, I did come to Stanford and ICME. Michael has been warm and friendly throughout my time at Stanford, and was more than happy to chair my committee.

**Funding sources.** I would like to acknowledge all the funding sources: ICME fellowships, HAI seed grant from Stanford, NIH and NSF grants through which Lei Xing and James Zou supported my research.

**Administrative staff.** April Prasad, Ana Diaz, Indira Choudhury, Jess Galvez, Julia Gillespie, Mikayla Booker, Olivia Bethel, and Corinne Beck have been extremely helpful over the years.

**Xing lab.** Lei has brought in outstanding postdocs to our lab with whom I had the opportunity to collaborate. I thank Masoud Badiei Khuzani, Maxime Bassenne, and Tauhidul Islam for constantly checking on me and the life lessons. I have really enjoyed coding with Maxime during weekends. Siqi Ye gave valuable inputs on my defense slides. Finally, thanks to fellow graduate students Hongyi Ren, Charles Huang, and Liyue Shen, and the visiting student Oscar Pastor-Serrano. Hongyi, in particular, for helping me debug code in person and over zoom calls.

**Other collaborators.** Cynthia Chuang, Eric Simiele, Emil Schueler, Bhavik Bansal, Chandrakant Lahariya, Giridara Gopal Parameswaran. These people helped me gather data for our projects and clarify clinical questions.

**My ICME cohort.** A big shout out to my unique and diverse cohort: Abeynaya Gnanasekaran, Alex Infanger, Allison Koenecke, Casey Chu, Halwest Mohammad, Jordi Feliu Faba, Jin(ny) Xie, Jing An, Julia Olivieri, Kailai Xu, Nimit Sohoni, Nurbek Tazhimbetov, and Steven Brill. We have created many moments together through baking parties, hikes, ICME lunches, white elephant for Christmas, game nights, birthday celebrations, gossip nights, IHOP dinners, etc. I would like to specifically acknowledge: Abeynaya for being the best collaborator I have had; Alex for his deep thoughts and conversations about books; Allison for her notes and list of things to do in the bay area; Casey for driving all the way from SF for post-defense dinners and get-togethers; Jordi for introducing me to Spanish food and Nana; Jinny for her excellent Instagram posts; Julia for being the most inclusive person I have met in my life; Nimit for never getting tired of roasting me and getting roasted; Nurbek for constantly alerting me of deadlines and pitfalls, for literally helping me fill forms, and for reluctantly walking with me to downtown Palo Alto for dinners; and Steven for always having something to say and for organizing numerous hikes.

**Other Stanford friends.** I have had many meals with Varsha Sankar and Aravindh Kumar. It was fun to spend time with you after my group meeting on Friday. I really enjoyed attending Varsha's dance performances and collaborating with her on the COVID project in this thesis.

Many thanks to my flatmate Byungwoo Kang for introducing me to Korean music, drama, and desserts and a bit of his neuroscience research.

Thanks to Carolyn Soo for our on-off conversations starting CME 308 and for introducing me to the delicious Singaporean Nona Kaya.

**Friends from across the world who kept in touch through text and occasional meetups.** Diana Thomas, Riju Vincent, Dennis Thomas, Tom Peter, Varsha Shastri, Sahil Pujari, Venkataramanan Narayanan, Deekshith Krishnan, Rohit Ralli, Karthik Shetty, Roshin Jacob Johnson, Zach Zajo, Arjun Prasad and Vinayraj Govindarajan.

**People I have known for a long time.** I feel lucky and thankful that I met Anoop Sreedhar, Aniruddha Mallya, Gautam Das Govardan, Jithin Sreedharan, Sivaramakrishnan (SRK) Iyer, Suhas Javagal, Thomas CM, Udayan Umaphathi, Vinay Sheshadri, and Swathi Prabhu many years ago. Vinay, Javagal, and Aniruddh immensely helped me when I moved to the bay area. Das' shayari, mimicry, and singing, accompanied by his long-term memory, have positively impacted my social life in the bay area. I'm thankful to Vinay and Swathi for letting me spend time with their son Abhinav. He was fun and helped me focus. Anoop and SRK always made it a point to meet me multiple times during my visits to Bangalore. With Jithin, I can comfortably talk research, life, food, music, and cinema. Many thanks to all of you for making my time in the bay area and India memorable.

**Samuel Joseph.** Heartfelt thanks to Sam for being a close friend, my most vigorous critique, and cheerleader. You are so protective of your time yet have consistently made time for me when I needed it.

**Family.** The best way to describe my relationship with my parents is we Skype every day. Good news or bad news, the first person who comes to mind is mom. I picked up an interest in music and languages from my father. My parents have put in enormous effort to make our home happy. And the best thing they did for me was my brother Siddarth. Thank you, Siddarth, for always telling me the harsh truth or reality, whether I like it or not. That's what I value the most from you. Also, thanks for teaching me how to be assertive.
